-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 31 July 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION**

1. The examiner acknowledges applicant's July 31, 2006 response to the Requirement for Election/Restriction, thanks the applicant for said courteous response, and, therefore, makes the following corrected Requirement for Election/Restriction.
2. Claims 1-23 are currently pending in this case.

***Election/Restrictions***

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-18 and 20-23, drawn to a method, apparatus and computer program for the analysis of commercial mortgage-backed portfolios, classified in class 705, subclass 36.
  - II. Claim 19, drawn to a computer-implemented method of analysis of commercial-mortgage-backed portfolios, including determining category size for each rating category, calculating combined profitability, computing resulting profitability based on trial spread, adjusting trial loan spread, classified in class 705, subclass 38.
4. The inventions are distinct, each from the other because of the following reasons:
5. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because invention I can be obtained

Art Unit: 3621

without carrying out the steps involved in invention II. The subcombination has separate utility such as portfolio analysis without adjusting loan terms.

6. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

7. Applicant is further advised, that, in the event of choosing Invention I, said Invention I is further subject to an election of species, as follows.

8. Claims 1, 20 and 23 are generic to the following disclosed patentably distinct species:

IA. Claims 2-3, drawn to a method, apparatus and computer program for the analysis of commercial mortgage-backed portfolios, wherein the user terminal comprises a personal computer.

IB. Claims 4-6, drawn to a method, apparatus and computer program for the analysis of commercial mortgage-backed portfolios, and including determining certain base information.

IC. Claims 7-18, drawn to a method, apparatus and computer program for the analysis of commercial mortgage-backed portfolios, and including calculating the loan spread for the additional mortgage loan.

ID. Claim 21, drawn to a method, apparatus and computer program for the analysis of commercial mortgage-backed portfolios, including storing various databases.

IE. Claims 22, drawn to a method, apparatus and computer program for the analysis of commercial mortgage-backed portfolios, including a communication device coupled to the processor.

9. The species are independent or distinct because each may be implemented without the others. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

10. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

11. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

12. The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not

Art Unit: 3621

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

13. Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

14. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

15. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cristina Owen Sherr whose telephone number is 571-272-6711. The examiner can normally be reached on 8:30-5:00 Monday through Friday.

16. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew J. Fischer can be reached on 571-272-6779. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
